DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 13-15, drawn to method of sealing plug-in connection elements, classified in class 29, subclass 858.
 - II. Claims 16-26, drawn to drawn to a plug-in connection element, classified in class439, subclass 275.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions of Group I and of Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as an injection molding.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. During a telephone conversation with William S. Gottschalk on May 23, 2002 a provisional election was made with a right to traverse to prosecute the invention of Group I, claims 13-15. Affirmation of this election must be made by applicant in replying to this Office action. Claims 16-26 withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Application/Control Number: 09/740,134

Art Unit: 3729

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Drawings

6. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "foam" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

7. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 112

- 8. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 9. Claims 13-15 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had

Art Unit: 3729

possession of the claimed invention. The disclosure, as originally filed, fails to provide support for steps c and d, where a plug-in connection element is provided with an entry point, not the lead.

- 10. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 11. Claims 13-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 13 recites the limitation "the foaming" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim 13 has ambiguous terminology which is unclear whether later recitation of originally recited terms is intended to refer to the originally recited terms. For example, "elements" in line 1 and "such elements" in line 2.

Claim 13, steps c and d: these two steps render vague and indefinite. Step a states that an element has an entry point, not the lead.

Claim Rejections - 35 USC § 102

12. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 13. Claims 13-15, as best understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Ito et al (US 4,454,381).

Conclusion

14. Applicants are duly reminded that a full and proper response to this Office Action that

includes any amendment to the claims and specification of the application as originally filed

requires that the applicant point out the support for any amendment made to the disclosure,

including the claims. See 37 CFR 1.111 and MPEP 2163.06.
